HEALTH BENEFIT PLANS

FDA-CLEARED · CLASS II
US VALIDATED DEVICE LISTING

CBP counts triple in Stars, and it rides on the year's last reading.

HEDIS CBP scores each member on the last BP of the year, and the lowest values count when readings share a date. Member-reported digital readings qualify once charted with date and values. A high last number leaves the gap open.[1]

The **PharmaSmart PS-2000D Health Station** gives members a validated, self-service reading at partner sites, ready for the chart in identified mode.

3×
CBP weight in 2027 Stars, vs 1× for process measures[2]

3.0
average CBP stars in 2027 ratings, down from 3.4[3]

$13.4B
minimum 2026 federal spend on MA quality bonuses[4]

60.5%
state Medicaid median CBP, ages 18–64, 2023 care[5]

Where it fits your member outreach

Q4 gap lists. Point open-gap members to a station. No appointment needed.

Same-day repeat. A high first reading gets a second; the lowest values count.

Care calls. Results by text or email give members a number to share with your nurse.

Community sites. Pharmacies and senior centers members already visit.

What it moves for your plan

Quality. Validated readings for the chart. Confirm CBP use with your HEDIS auditor.

Accuracy. Seated, automated. The only kiosks on the US Validated Device Listing.

Revenue. CBP is 10% of the score on Medi-Cal's 1% capitation withhold, CY2026.[6]

Data capture. 60–80% of people surveyed held back from their clinician.[7] Private screen questions offer members another way to answer.

The math

4 stars adds 5 points to the MA benchmark; bonuses averaged **$381 per individual-plan enrollee** in 2026.[4] 20 readings a day frees 1 to 1.7 staff hours at a site.

Recommended setup

Ask about EHR and availability

PS-2000D	Clinics and senior sites: BP, pulse, weight and BMI
PS-2000CX	Tight spaces: BP and pulse, smaller footprint

In the field: many installations are part of employer wellness plans. In a small published pilot, a Midwestern health plan and a pharmacy chain linked kiosk readings to pharmacist follow-up.[8]
