SENIOR CARE

FDA-CLEARED · CLASS II
US VALIDATED DEVICE LISTING

A change of condition doesn't wait for the next nurse visit.

Residential care runs on aides: 71% of residents need help walking[1] and RNs are 12% of nursing FTEs.[2] So a shift in blood pressure or weight can go unseen until the next nurse visit, or until a family asks.

The **PharmaSmart PS-2000D Health Station** gives residents a validated, wheelchair-accessible BP, pulse and weight check, with no nurse tied up.

58%
of residents ever diagnosed with high blood pressure[1]

29.6%
of communities directly employ at least one RN FTE[2]

27.6%
of adults 65+ reported a fall in the prior year[3]

23.9%
in long-term care have orthostatic hypotension[4]

Where it fits your community

Independent living. Residents take their own reading, with no appointment.

Assisted living. A repeatable reading between nurse visits, with aide help if needed.

Fall-risk reviews. Seated BP and weight trends. Staff still take standing BP.

Team wellness. De-identified screening for staff; no individual result reaches you.

What it moves for your community

Safety. BP, pulse and weight trends for care-plan and fall-risk reviews.

Accuracy. The only kiosks on the US Validated Device Listing. Fits 97% of adults.

Experience. Results by print, text or email. Family view with resident consent.

Data capture. 60–80% of people surveyed held back from their clinician.[5] Private screen questions offer residents another way to answer.

The math

Weekly checks for 60 residents at 3–5 minutes saved each gives back 3 to 5 staff hours a week. With assisted living occupancy at 89.1%,[6] a visible wellness program helps you stand out.

Recommended setup

Ask about EHR and availability

PS-2000D	Wellness center or lobby: BP, pulse, weight and BMI
PS-2000CX	Tighter spaces: BP and pulse, smaller footprint

In the field: the Arkansas Department of Health and the New York City Department of Health have deployed PharmaSmart stations; PCORI-funded BP-CHECK at Kaiser Permanente Washington tested the kiosk.[7]
